Prompt Injection objectives

P Priyanka Paudel
Free

For each of the tasks below, find the corresponding feature (number) in the annotated ChatGPT figure:

1. You want to start a new conversation thread
2. You want to search for an old conversation(s) using a keyword or a phrase
3. Your saved documents and images, stored for reference or future access
4. You want to use a video-based AI assistant from OpenAI, optimized for multimodal interaction
5. You want to use launchpad for custom-built GPTs — specialized bots with defined personalities or tasks
6. You want external GPT integration focused on video creation or editing (non-core feature)
7. You want an access point for subscription and billing, unlock premium model access and perks
8. Your want to define an interface for how ChatGPT should behave — tone, context, preferences
9. You want to open app-level config options: themes, language, default model, etc.
10. You want to route FAQs, troubleshooting, and feedback channels

11. You want to log out

12. You want to use a different model for the session

13. Your want to interact by typing prompts

14. You want to attach file or any multimodal inputs

15. You want to speak instead of typing prompts

16. You want a temporary session

17. You want to search all past conversations revisit threads.

18. You want to share your findings

19. You want to archive, delete, report

20. You want to upgrade to a premium version
